Shelter in Place Update

The newest **health order** is set to take effect on Monday, May 4. For more information on this order, visit the FAQ page [here](#).

During these unprecedented times, our parks, trails and open spaces remain open to allow people to go outside and get some fresh air when needed. Those not in **vulnerable groups** can continue to spend time outdoors while complying with the social distancing recommendations of staying at least 6 feet apart unless you share a household. It is OK to go outside to go for a walk, run, ride a bike, and hike alone or with someone in your household at your local park. If you drive your car, it’s too far.

The health and safety of our park users is our top priority. We are advising park visitors to continue to follow **DPH guidance** around social distancing and adhere to the "Shelter in Place" order to help reduce the spread of COVID-19.
